Assessment information:

limited clinical evaluation and recommendations provided

- This does **not** include a formal risk assessment (service to be sourced by requester if required)
- This will provide guidance and suggestions for clinical (i.e. psychiatric, psychological, and/or addictions rehabilitation) interventions relevant to sentencing
- This **will not** include psychological testing (service to be sourced by requester if required)
- **NB: FACS does not perform FASD assessments**

Note: For sexual or domestic violence offences, if the community-based sentence includes a condition for assessment and treatment at FACS, the relevant team will carry out a clinical evaluation and formal risk assessment, provide recommendations for appropriate interventions, and engage the offender in treatment.

Report (or excerpts) may be released to: Court; Crown Prosecutor; Defence Counsel; FACS; Community Corrections; Other health care providers
(cross out any that do not apply)
